

Week 02 Exercise

UI, Widgets, and Layouts

Instructions

For your exercise, you are going to create a Flutter app with Dart. The goal of this exercise is to create a simple flutter app that contains your profile information. The features of your app are given below. Make sure to adhere to the [exercise guidelines](#). This exercise is for 10 points.

The assignment link for this week does not have a template. Create a <exercise2_surname> Flutter app and link it to your repository.

App Specifications

Think of this application as your profile in a social media account. This app only has one page that contains the following information:

- **Picture**
The picture should be something that resonates with you. Either a picture of yourself or something you like. Make sure that the image is saved inside your project directory.
- **Name**
- **Birthday**
- **Location**
- **Bio**
Write at least 3 sentences about yourself. It can be about your principles in life, your beliefs, or anything you are willing to share publicly.
- **Hobbies**
List down at least 5 of your hobbies. Make sure that you put the hobbies in a list and loop through it to show in the UI.

You are free to style your app according to your preferences.

Bonus: 1 point bonus will be given for a good user interface and user experience. Using the default Material App design used in the deduction is not counted for this bonus.
